DESIGNED FOR YOU

## Fitting Guide

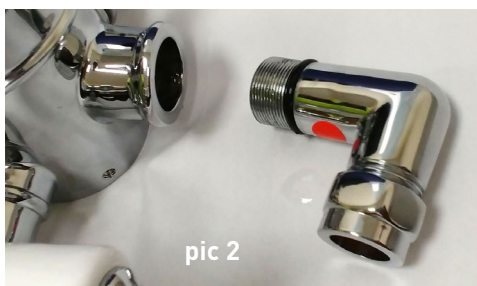

Range:	Brassware
Type:	Faith Shower Valves - Re-Alignment Guide
Code:	HFVP001
Version/Date:	v1 04/18

Use this guide if the main body screws are situated at the top. To correct the vertical alignment of the Shower Valve parts, please follow these instructions:

- Unscrew the top adapter hose (pic 1) and swap with the bottom adapter hose

- Swap the side hot elbow (pic 2) and cold elbows by unscrewing and re-fitting onto the opposite side. The hot (red) inlet should now be on the left, cold on the right (pic 3)

- Remove the centre cap by unscrewing, then remove the centre crosshead screw
- Lift off the temperature adjustment handle
- Using a suitable allen key, unscrew the small grub screw on the side on the main section (pic 4)
- Remove and rotate the temperature indicator shroud 180°, the grub screw should also have moved 180°. Tighten it again
- Reverse the process to attach all parts making sure all are tightened
- Test the unit before installation

Guarantee/Aftercare: During installation extra care must be taken to avoid damaging the fittings. We provide a guarantee against faulty manufacture or materials (excluding serviceable parts), providing they have been installed, cared for and used in accordance with our instructions and good plumbing practice.
